About Bio-IT World

Part of Healthtech Publishing, Bio-IT World provides outstanding coverage of cutting-edge trends and technologies that impact the management and analysis of life sciences data, including next-generation sequencing, drug discovery, predictive and systems biology, informatics tools, clinical trials, and personalized medicine. Through a variety of sources including, Bio-ITWorld.com, Weekly Update Newsletter and the Bio-IT World News Bulletins, Bio-IT World is a leading source of news and opinion on technology and strategic innovation in the life sciences, including drug discovery and development.

Animal Models

hTME-3DX Screen and Verify

BioDuro

11011 Torreyana Road
San Diego, CA 92129
(858) 552-6690
www.bioduro.com

Humanized tumor microenvironment, three-dimensional drug screening and patient-derived xenograft verification platform.

ONCOREF MAPK Mutation Panel Reference Standards

Applied StemCell Inc.

521 Cottonwood Drive, Suite 111
Milpitas, CA 95035
(408) 773-8007
www.appliedstemcell.com

Applied StemCell is a California-based biotech company that is employing the most advanced genome editing technologies for the generation of molecular reference standards. Our existing, ONCOREF™ product series, features the largest MAPK mutation panel currently on the market. In addition to off-the-shelf products, we offer custom services and collaborative efforts to help advance the next generation of molecular reference standards.

PDOX® Pre-Clinical Research Services

AntiCancer PDOX, Inc.
7917 Ostrow Street
San Diego, CA 92111
(858) 654-2555
anticancerpdox.com

The PDOX technique is the most clinically accurate mouse cancer model, especially with regard to metastasis and drug sensitivity. Using GFP imaging, primary tumor growth and metastases can be tracked in real-time. Effective drugs can be rapidly discovered and evaluated in PDOX models utilizing human tumor cell lines and patient tumors. We provide customized contract services for in vivo drug evaluation, including developing cancer models and design of individual protocols.

Vevo 3100

Fujifilm, Visualsonics Inc.
3080 Yonge Street
Toronto, Canada M4N3N1
(416) 580-0258
www.visualsonics.com

The Vevo 3100 is a new and innovative platform created for the future of imaging. It combines ultra high-frequency ultrasound imaging, quantification and education in a convenient easy to use all-in-one platform designed for small animal studies.

Backup & Recovery

NODEUM

MT-C S.A.

Rue Ernest Solvay 29 A
Liège, Belgium 4000
mt-c.com/

MT-C has reinvented intelligent storage to create innovative and strategic storage solutions encompassing today's market challenges. MT-C has designed and developed NODEUM, a forefront Software-Defined Storage appliance. It delivers unique combination of intelligent data analytics layer and virtualized file system distributing data on hybrid storage. MT-C has become a key actor in industries that are facing the big data explosion such as the life science and genomics..

Bioinformatics

Bioinformatics Services

Systems Imagination Inc.

7730 E. Greenway Suite 205
Scottsdale, AZ 85260
www.systemsimagination.com

Systems Imagination offers tech-enabled services to accelerate the discovery and evolution of scientific knowledge. SII's Big Data to Knowledge Solution uses a proprietary knowledge computing platform and expert analytical services by world-class team of experts, enabling clients to translate Big Data into useful scientific knowledge with unprecedented speed and precision.

BIOVIA Insight 2017 R2

Dassault Systèmes BIOVIA
5005 Wateridge Vista Drive
San Diego, CA 92121
(415) 694-6795
accelrys.com/

BIOVIA Insight 2017 R2 marks a large step forward in BIOVIA Insight's data aggregation and performance capabilities for large data sets. 500,000 data points can now be plotted in under three seconds and new charting capabilities including support for deep data plotting and series plots builds upon an already strong collection of visualization tools such as 2D SAR heat maps and custom radar plots.

BD Rhapsody™ Single Cell Analysis System

Becton, Dickinson and Company
1 Becton Drive
Franklin Lakes, NJ 07417-1880
(650) 665-2400
www.bd.com/

BD Rhapsody is a single-cell analysis system of reagents, instruments, and software that enables targeted RNA expression analysis. Rhapsody can generate similar results as whole transcriptome analysis at a fraction of time and cost. Available with application-specific targeted panels and custom targeted panels. BD plans to expand capabilities rapidly, including protein expression analysis assays available now through an early access program with commercial availability planned for 2018.

Clinical Trial Data Analysis, Biostatistics Consulting

AmPharm Statistics
296 Engle Street
Tenafly, NJ 07670
(844) 674-3377
ampharmstatistics.com/statistics/

AmPharm Statistics specializes in Pharmaceutical Statistics and Reporting. Our team of elite statisticians, programmers, and medical writers can provide your pharmaceutical company with top notch consulting services to satisfy your needs.

Cofactor FFPEExact

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

Low-quality RNA-Seq. With the vast majority of patient samples and clinical archives stored as FFPE tissue, a reliable solution for chemically-modified and fragmented RNA is required. FFPEExact evaluates RNA fragmentation via DV200 analysis, then applies standardized library prep protocols to guarantee reproducible, interpretable results. Delivers: 1) Non-biased analysis of fragmented RNA 2) Minimal reads lost to ribosomal content 3) Access to valuable clinical archives and patient samples.

Cofactor mRNAble

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

RNA-seq poly(A) enrichment of mRNA species in your samples. Focus your sequencing reads on coding regions of the transcriptome with 30- or 60-million reads, guaranteed, with 3 week turnaround. Make the most of your analysis with transcript annotation. Excellent approach for model and non-model organisms, alike.

Cofactor picoRNA

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

Low-input RNA Expression Characterization. Perfect for precious biological samples resulting from: LCM, sorted cells, FNAs, or other small snap-frozen tissue biopsies that yield minimal, yet high-quality RNA (< 250 ng). Cofactor has developed this robust amplification protocol to allow unbiased interpretation of transcriptome data from as low as 10-20 cells (100 pg of RNA).

Cofactor Total RNAbale

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

RNA-seq of total RNA including non-coding species achieved through depletion of ribosomal species. Allows for the analysis of lncRNA and non-polyadenylated species. More forgiving molecular approach than poly(A), able to accommodate some sample degradation. Access the breadth of your sample's transcriptome! Ideal for model organisms (HMR). All projects include our molecular QC checkpoints at each stage in the molecular workflow, and full DE analysis delivered via the ActiveSite interface.

Microbiome Discovery Service

Second Genome Solutions
341 Allerton Avenue
South San Francisco, CA 94080
(650) 489-7871
www.secondgenome.com/solutions/

Second Genome Solutions offers an end-to-end Microbiome Discovery Service allowing you to go from Sample to Smarter. Each project is customized to your specific study and includes sample collection logistics, nucleic acid isolation, raw data generation, bioinformatics, and data interpretation.

Second Genome has developed an industry leading Microbial Profiling platform built on proprietary databases that has been used on over 400 projects and processed over 75,000 samples.

miRNAbale

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

Small RNA-seq. Enrichment of small RNA molecules including miRNA, snoRNA, and more. Economical read depth (10 million reads) ensures high coverage of desired molecules. Annotation using comprehensive database and comparative expression analysis. Cofactor's small RNA characterization is optimized for total RNA samples, which streamlines sample delivery for you.

Online Master of Advanced Study in Health Informatics

Arizona State University Online
1365 N Scottsdale Road
Scottsdale, AZ 85257
(866) 277-6589
asuonline.asu.edu

ASU Online is dedicated to providing innovative, high-quality online education to Sun Devils from across the country and around the world. ASU's Master of Advanced Study in Health Informatics, offered online through the Department of Biomedical Informatics, provides an innovative approach to combine information technology, computer science and knowledge management to improve health. The MAS program is offered entirely online and can be taken full-time or part-time.

SeqsLab

Atgenomix
Rm. 918, 9F, 96, Chia Hsin Bldg. (Second Bldg.) Sec. 2,
Zhongshan N. Rd., Zhongshan Dist.
Taipei, Taiwan
+88 69-860-89616
www.atgenomix.com

Enterprise-grade analysis platform for your NGS whole genome and exome best practices powered by Apache Spark/Hadoop: 10X FASTQ, BAM to VCF acceleration; 50% Lower computing cost; 4hrs BWA/GATK workflow turnaround

T-Bio

Pine Biotech
1441 Canal Street
New Orleans, LA 70112
(504) 267-7789
www.pine-biotech.com

BioInfoPLATFORM is a flexible and user-friendly bioinformatics distributed computational system. It is meant to provide an intuitive and user-friendly interface for building pipelines (chains) of bioinformatics algorithms for the analysis of big data: NG genomics and transcriptomics sequencing, mass-spectroscopy proteomics/metabolomics, as well as phenotypic visual information and knowledge databases.

Business & IT Consulting

Clinical Trial Data Analysis, Biostatistics Consulting

AmPharm Statistics
296 Engle Street
Tenafly, NJ 07670
(844) 674-3377

ampharmstatistics.com/statistics/

AmPharm Statistics specializes in Pharmaceutical Statistics and Reporting. Our team of elite statisticians, programmers, and medical writers can provide your pharmaceutical company with top notch consulting services to satisfy your needs.

Business Intelligence

XIFIN RPM

XIFIN
12225 El Camino Real
San Diego, CA 92130
(858) 436-2995
www.xifin.com

XIFIN ProNet: Physician Collaboration and Clinical Data Management

XIFIN RPM (Revenue Performance Management) give laboratories the ability to take control of their billing operations and financial performance. Maximize your financial performance with a technology platform and optimized business processes. Gain control and visibility over reimbursement and AR, with auditable, GAAP & SOX-compliant, scalable solution.

Insight Pharma Reports

Insight Pharma Reports
250 First Avenue, Suite 300
Needham, MA 02494
Phone: 781-972-5400
www.insightpharmareports.com

Insight Pharma Reports are written by experts in consulting and industry who collaborate with us to provide a series of reports that evaluate the salient issues in pharmaceutical technology, business, and therapy markets. Insight Pharma Reports are used by leading pharmaceutical, biotech, diagnostic, consulting, and financial companies to keep abreast of the latest advances in pharmaceutical R&D, their potential applications and business impacts, and their current and future position in the marketplace.

Cellular Analysis

Cell Counting Kit-8 (CCK-8)

Abbkine Scientific
Bldg 1, Harbour of Technology Times, No.35, Optical Valley Avenue
Wuhan, China 430074
0-27-597-16789
www.abbkine.com

Cell Counting Kit-8 (CCK-8) is designed to detect cell proliferation and cell toxicity based on WST-8 is reduced by dehydrogenases in cells to give an orange colored product (formazan). The amount of the formazan in cells is directly proportional to the number of living cells. Tests confirm that performance equals or exceeds popular CCK-8 kit from other suppliers.

Clinical Trials

Clinical Trial Data Analysis, Biostatistics Consulting

AmPharm Statistics
296 Engle Street
Tenafly, NJ 07670
(844) 674-3377
ampharmstatistics.com/statistics/

AmPharm Statistics specializes in Pharmaceutical Statistics and Reporting. Our team of elite statisticians, programmers, and medical writers can provide your pharmaceutical company with top notch consulting services to satisfy your needs.

Cloud Computing

XIFIN LIS Anywhere

XIFIN
12225 El Camino Real
San Diego, CA 92130
(858) 436-2995
www.xifin.com

Leverage your clinical data and optimize your laboratory operations with a cloud-based, multidisciplinary Laboratory Information System. Combining processing efficiency, workflow optimization, quality assurance and data validation, XIFIN LIS Anywhere enables laboratories to stay competitive in an increasing complex environment.

XIFIN ProNet

XIFIN
12225 El Camino Real
San Diego, CA 92130
(858) 436-2995
www.xifin.com

XIFIN ProNet: Physician Collaboration and Clinical Data Management
Collaborate and communicate across departments, disciplines, and organizations in a cloud-based exchange of diagnostic images, clinical data, and other patient encounter information. XIFIN ProNet enables consolidated storage, sharing, and usage of clinical and financial images and information with a web-based enterprise class data repository and integrated workflows.

CMS

Asset Panda

www.assetpanda.com/
3001 Dallas Parkway, Suite 580
Frisco, TX 75034
(855) 898-6058
www.assetpanda.com/

Asset Panda supplies asset tracking software and a free mobile app with built-in scanner to track everything from equipment, to inventory, to schedules. Asset Panda provides the platform, hosted in the cloud, which is completely customizable for businesses and people to track the things they need to.

Contract Services

hTME-3DX Screen and Verify

BioDuro
11011 Torreyana Road
San Diego, CA 92129
(858) 552-6690
www.bioduro.com

Humanized tumor microenvironment, three-dimensional drug screening and patient-derived xenograft verification platform.

iSpecimen Marketplace

iSpecimen
450 Bedford Street, Suite 1100
Lexington, MA 02420
(781) 301-6700
www.ispecimen.com

The iSpecimen Marketplace provides researchers with the specimens they need from the patients they want. It connects healthcare organizations that have access to patients and specimens, including biofluids, solid tissues, and viable cells, with scientists who need them. Researchers log on and gain instant access to millions of specimens anytime, anywhere. Provider organizations gain an opportunity to contribute their specimens compliantly to medical research as well as enhance their bottom line.

www.cofactorgenomics.com

RNA-seq poly(A) enrichment of mRNA species in your samples. Focus your sequencing reads on coding regions of the transcriptome with 30- or 60-million reads, guaranteed, with 3 week turnaround. Make the most of your analysis with transcript annotation. Excellent approach for model and non-model organisms, alike.

Cofactor Paragon

Cofactor Genomics

4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647

www.cofactorgenomics.com

Paragon: Profiling micro-environment cell report for Immunology. Cofactor Paragon reports on the cellular components of the tumor micro-environment. 32 cell types are reported and provide valuable insight in studies aimed at understanding how the micro-environment and the immune activity plays a key role in efficacy of treatment.

Cofactor picoRNA

Cofactor Genomics

4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647

www.cofactorgenomics.com

Low-input RNA Expression Characterization. Perfect for precious biological samples resulting from: LCM, sorted cells, FNAs, or other small snap-frozen tissue biopsies that yield minimal, yet high-quality RNA (< 250 ng). Cofactor has developed this robust amplification protocol to allow unbiased interpretation of transcriptome data from as low as 10-20 cells (100 pg of RNA).

Cofactor Pinnacle

Cofactor Genomics

4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647

www.cofactorgenomics.com

Pinnacle: The RNA-based biomarker panel for cancer. Cofactor Pinnacle enables the identification of important cancer associated features, not detectable by DNA sequencing alone. Pinnacle measures the RNA expression of 318 prominent cancer genes, identifies those with oncogenic expression, and enables fusion identification in 283 critical cancer associated genes from any type of formalin-fixed or fresh frozen solid tumor in a CAP-CLIA certified lab.

Cofactor Total RNABLE

Cofactor Genomics

4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647

www.cofactorgenomics.com

RNA-seq of total RNA including non-coding species achieved through depletion of ribosomal species. Allows for the analysis of lncRNA and non-polyadenylated species. More forgiving molecular approach than poly(A), able to accommodate some sample degradation. Access the breadth of your sample's transcriptome! Ideal for model organisms (HMR). sciNote ELN

sciNote LLC

3000 Parmenter Street
Middleton, WI 53562
scinote.net/

sciNote is a free, open source electronic lab notebook. It is developed for scientists to manage and organize their research data and safely store it all in one place. It can also be used as a communication tool between professors and students, since it encourages scientific collaboration. It can either be used as cloud software or installed locally.

Diagnostics

Iron oxide nanoparticles

BOC Sciences

45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

BOC Sciences offers high-quality superparamagnetic iron oxide microbeads. Our products include various-sized magnetic beads with different coupling groups for the conjugation of biomolecules. We have established a high-level platform that involves many scientists and a full set of instruments to guarantee the quality of our products and services and thereby help to facilitate your researches.

Micro Linear Actuator

Actuonix Motion Devices Inc

580 Starling Lane
Victoria, B.C., Canada V9E2A9
(206) 347-9684
www.actuonix.com

Actuonix actuators are used in a wide range of applications from molecular diagnostic machines, to x-ray laser test facilities, and experiments on the International Space Station.

Our products help OEM companies meet the challenge of designing motion-enabled products in continually shrinking sizes and shapes.

Need a custom micro linear actuator? We can help. Our team of engineers will work closely with your business to design a custom linear actuator to suit your specifications.

XIFIN LIS Anywhere

XIFIN

12225 El Camino Real
San Diego, CA 92130

One-Click Access to Full-Text Content

Article Galaxy is an award-winning software-as-a-service (SaaS) research platform that provides you with one-click access to any scientific paper, filtering against Open Access, subscriptions, and even full-text rentals. Article Galaxy Widget injects into any website via browser bookmark and extracts citations for simplified viewing, enabling you to access, purchase or rent full-text documents right within your search results on 70+ search portals!

Drug Discovery

6-Carboxytetramethylrhodamine

BOC Sciences

45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

6-carboxy derivatives of tetramethylrhodamine is one of the most convenient compounds of Xanthen fluorescent dye tetramethylrhodamine. 6-Carboxytetramethylrhodamine is a long-wavelength dye. Besides that, it also can be used for labeling of biomolecules, e.g., DNA, PNA, and peptides. Fluorescence: λ_{ex} 543 nm, λ_{em} 575 nm in 0.1 M Tris pH 8.0; λ_{ex} 540 nm, λ_{em} 565 nm in methanol; λ_{ex} 555 nm, λ_{em} 580 nm; λ_{ex} 541 nm, λ_{em} 568 nm in DMSO

Antibody Drug Conjugates

BOC Sciences

45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

Antibody-drug conjugates (ADCs) are a very important class of highly potent drugs designed as a targeted therapy for the treatment of people who has cancer.

Camptothecin

Musechem

7220 Rosemead Boulevard, Suite 202-10
San Gabriel, CA 91775
(800) 259-7612
www.musechem.com

Camptothecin (CPT) is a potent DNA enzyme topoisomerase I (topo I) inhibitor with an IC50 and IC70 of 50 nM and 0.225 μ M for breast cancer cell line MDA-MB-231.

IC50 Value: 50 nM(in MDA-MB-231 cell line)

Target: topoisomerase

Cariprazine

BOC Sciences

45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

Cariprazine is an orally active D2/D3 dopamine receptor antagonist exhibits high selectivity and affinity to dopamine D3 and D2 receptors and moderate affinity to serotonin 5-HT(1A) receptors. It is used as an antipsychotic drug candidate for the potential treatment of schizophrenia, bipolar mania and depression. It has also been used as a potential adjunct in treatment-resistant major depressive disorder.

Fluorescent dyes, phosphoramidites for oligonucleotide synthesis

Lumiprobe

1835 E. Hallandale Beach Boulevard #221
Hallandale Beach, FL 33009
(888) 973-6353
www.lumiprobe.com

Lumiprobe manufactures & sells fluorescent dyes, phosphoramidites for oligonucleotide synthesis, Click chemicals and other reagents. Most items are ready for immediate shipping to worldwide locations.

hTME-3DX Screen and Verify

BioDuro

11011 Torreyana Road
San Diego, CA 92129
(858) 552-6690
www.bioduro.com

Humanized tumor microenvironment, three-dimensional drug screening and patient-derived xenograft verification platform.

Iron oxide nanoparticles

BOC Sciences

45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

BOC Sciences offers high-quality superparamagnetic iron oxide microbeads. Our products include various-sized magnetic beads with different coupling groups for the conjugation of biomolecules. We have established a high-level platform that involves many scientists and a full set of instruments to guarantee the quality of our products and services and thereby help to facilitate your researches.

PDOX® Pre-Clinical Research Services

AntiCancer PDOX, Inc.

7917 Ostrow Street
San Diego, CA 92111
(858) 654-2555
anticancerpdox.com

The PDOX technique is the most clinically accurate mouse cancer model, especially with regard to metastasis and drug sensitivity. Using GFP imaging, primary tumor growth and metastases can be tracked in real-time. Effective drugs can be rapidly discovered and evaluated in PDOX models utilizing human tumor cell lines and patient tumors. We provide customized contract services for in vivo drug evaluation, including developing cancer models and design of individual protocols.

ULTimate YChemH

HYBRIGENICS CORP.

1 Broadway
Cambridge, MA 02142
www.hybrigenics-services.com/contents/our-services/discover/ultimate-ychemh

ULTimate YChemH is a unique screening platform for target deconvolution of bioactive compounds, to decipher mechanisms of action, to identify secondary targets, to reposition drugs and to predict toxicity

Financial Services

XIFIN RPM

XIFIN

12225 El Camino Real
San Diego, CA 92130
(858) 436-2995
www.xifin.com

XIFIN ProNet: Physician Collaboration and Clinical Data Management

XIFIN RPM (Revenue Performance Management) give laboratories the ability to take control of their billing operations and financial performance. Maximize your financial performance with a technology platform and optimized business processes. Gain control and visibility over reimbursement and AR, with auditable, GAAP & SOX-compliant, scalable solution.

Genomics

BD Rhapsody™ Single Cell Analysis System

Becton, Dickinson and Company

1 Becton Drive
Franklin Lakes, NJ 07417-1880
(650) 665-2400
www.bd.com/

BD Rhapsody is a single-cell analysis system of reagents, instruments, and software that enables targeted RNA expression analysis. Rhapsody can generate similar results as whole transcriptome analysis at a fraction of time and cost. Available with application-specific targeted panels and custom targeted panels. BD plans to expand capabilities rapidly, including protein expression analysis assays available now through an early access program with commercial availability planned for 2018.

ONCOREF MAPK Mutation Panel Reference Standards

Applied StemCell Inc.

521 Cottonwood Drive, Suite 111
Milpitas, CA 95035
(408) 773-8007
www.appliedstemcell.com

Applied StemCell is a California-based biotech company that is employing the most advanced genome editing technologies for the generation of molecular reference standards. Our existing, ONCOREF™ product series, features the largest MAPK mutation panel currently on the market. In addition to off-the-shelf products, we offer custom services and collaborative efforts to help advance the next generation of molecular reference standards.

SeqsLab

Atgenomix

Rm. 918, 9F, 96, Chia Hsin Bldg. (Second Bldg.) Sec. 2,
Zhongshan N. Rd., Zhongshan Dist.
Taipei, Taiwan
+88 69-860-89616
www.atgenomix.com

Enterprise-grade analysis platform for your NGS whole genome and exome best practices powered by Apache Spark/Hadoop: 10X FASTQ, BAM to VCF acceleration; 50% Lower computing cost; 4hrs BWA/GATK workflow turnaround

T-Bio

Pine Biotech

1441 Canal Street
New Orleans, LA 70112
(504) 267-7789
www.pine-biotech.com

BioInfoPLATFORM is a flexible and user-friendly bioinformatics distributed computational system. It is meant to provide an intuitive and user -friendly interface for building pipelines (chains) of bioinformatics algorithms for the analysis of big data: NG genomics and transcriptomics sequencing, mass-spectroscopy proteomics/metabolomics, as well as phenotypic visual information and knowledge databases.

Thermo Fisher Scientific MagMAX DNA Multi-Sample Ultra 2.0

Thermo Fisher

168 3rd Avenue
Waltham, MA 02451
(617) 275-6547
www.thermofisher.com

MagMAX DNA Multi-Sample Ultra 2.0 reagents provide genetic testing companies, labs and service providers with fast, hassle-free and high-throughput DNA extraction from blood, saliva, buffy coat and buccal swabs. Using magnetic beads on an automated system, the reagents enable labs to standardize and accelerate sample purification while maintaining consistent results. They can purify DNA from 96 samples in 45 minutes using a simplified protocol for either small- or large-volume sample input.

Invitrogen TrueCut Cas9 Protein v2

Thermo Fisher

168 3rd Avenue
Waltham, MA 02451
(617) 275-6547
www.thermofisher.com

The latest version of Thermo Fisher Scientific's Cas9 protein is designed to deliver maximum editing efficiency in a broad range of cells, including standard, immune, primary and stem cells. The next generation CRISPR-Cas9 protein provides a robust, reliable and efficient way of knocking out a gene's expression, introducing changes or making precise edits. It is designed to deliver consistently high editing efficiency, even in difficult targets or in cells that are difficult to transfect.

Micro Linear Actuator

Actuonix Motion Devices Inc
580 Starling Lane
Victoria, B.C., Canada V9E2A9
(206) 347-9684
www.actuonix.com

Actuonix actuators are used in a wide range of applications from molecular diagnostic machines, to x-ray laser test facilities, and experiments on the International Space Station.

Our products help OEM companies meet the challenge of designing motion-enabled products in continually shrinking sizes and shapes.

Need a custom micro linear actuator? We can help. Our team of engineers will work closely with your business to design a custom linear actuator to suit your specifications.

Health IT

Online Master of Advanced Study in Health Informatics

Arizona State University Online
1365 N Scottsdale Road
Scottsdale, AZ 85257
(866) 277-6589
asuonline.asu.edu

ASU Online is dedicated to providing innovative, high-quality online education to Sun Devils from across the country and around the world. ASU's Master of Advanced Study in Health Informatics, offered online through the Department of Biomedical Informatics, provides an innovative approach to combine information technology, computer science and knowledge management to improve health. The MAS program is offered entirely online and can be taken full-time or part-time.

XIFIN ProNet

XIFIN

12225 El Camino Real
San Diego, CA 92130

www.xifin.com

XIFIN ProNet: Physician Collaboration and Clinical Data Management

Collaborate and communicate across departments, disciplines, and organizations in a cloud-based exchange of diagnostic images, clinical data, and other patient encounter information. XIFIN ProNet enables consolidated storage, sharing, and usage of clinical and financial images and information with a web-based enterprise class data repository and integrated workflows.

Imaging

Slidematch

microDimensions
Rupert-Mayer-Str. 44 // Gebäude 64.07
München, Germany 81379
0 89 189425334
micro-dimensions.com

microDimensions Slidematch™ is a simple yet powerful tool that takes a series of whole slide images, aligns all of them accurately, and then saves the aligned images as a new series of whole slide images. This enables correlation and/or masked analyses.

Vevo 3100

Fujifilm, Visualsonics Inc.
3080 Yonge Street
Toronto, Canada M4N3N1
(416) 580-0258
www.visualsonics.com

The Vevo 3100 is a new and innovative platform created for the future of imaging. It combines ultra high-frequency ultrasound imaging, quantification and education in a convenient easy to use all-in-one platform designed for small animal studies.

Voloom

microDimensions
Rupert-Mayer-Str. 44 // Gebäude 64.07
München, Germany 81379
0 89 189425334
micro-dimensions.com

microDimensions Voloom® is the most intuitive and automated software solution for 3D histology reconstruction, visualization, and analysis in digital pathology. Voloom helps pharmaceutical, biotechnology, and pathology researchers with cell counting, tumor border computation, scoring, volume measurements, finding regions in serial sections, and many more histology applications.

Zoom

microDimensions

Rupert-Mayer-Str. 44 // Gebäude 64.07
München, Germany 81379
0 89 189425334
micro-dimensions.com

microDimensions Zoom is a free of charge digital pathology viewer for fast visualization of whole slide images and image series. It supports all major proprietary as well as generic file formats.

Immunoassays

Cell Counting Kit-8 (CCK-8)

Abbkine Scientific
Bldg 1, Harbour of Technology Times, No.35, Optical Valley West
Wuhan, China 430074
0-27-597-16789
www.abbkine.com

Cell Counting Kit-8 (CCK-8) is designed to detect cell proliferation and cell toxicity based on WST-8 is reduced by dehydrogenases in cells to give an orange colored product (formazan). The amount of the formazan in cells is directly proportional to the number of living cells. Tests confirm that performance equals or exceeds popular CCK-8 kit from other suppliers.

IT Services / IT Solutions

Alba Spectrum

1715 West Wabansia Avenue
Chicago, IL 60622
(773) 384-9264
www.albaspectrum.com/

Alba Spectrum helps customers optimize their Microsoft Dynamics GP investment with products and services. They help companies that have Microsoft Dynamics GP already and those looking to purchase Microsoft Dynamics GP. Visit their website to learn more about how they can help your business grow.

iSpecimen Marketplace

iSpecimen
450 Bedford Street, Suite 1100
Lexington, MA 02420
(781) 301-6700
www.ispecimen.com

The iSpecimen Marketplace provides researchers with the specimens they need from the patients they want. It connects healthcare organizations that have access to patients and specimens, including biofluids, solid tissues, and viable cells, with scientists who need them. Researchers log on and gain instant access to millions of specimens anytime, anywhere. Provider organizations gain an opportunity to contribute their specimens compliantly to medical research as well as enhance their bottom line.

BIOVIA Insight 2017 R2

Dassault Systèmes BIOVIA
5005 Wateridge Vista Drive
San Diego, CA 92121
(415) 694-6795
accelrys.com/

BIOVIA Insight 2017 R2 marks a large step forward in BIOVIA Insight's data aggregation and performance capabilities for large data sets. 500,000 data points can now be plotted in under three seconds and new charting capabilities including support for deep data plotting and series plots builds upon an already strong collection of visualization tools such as 2D SAR heat maps and custom radar plots.

The Fitzpatrick Company

832 Industrial Drive
Elmhurst, IL 60126
www.fitzmill.com/page/hammer-mills

The Fitzpatrick Company manufactures proven, high-performance solids processing equipment for a wide range of products including pharmaceuticals, chemicals, biotech and more.

XIFIN LIS Anywhere

XIFIN
12225 El Camino Real
San Diego, CA 92130
(858) 436-2995
www.xifin.com

Leverage your clinical data and optimize your laboratory operations with a cloud-based, multidisciplinary Laboratory Information System. Combining processing efficiency, workflow optimization, quality assurance and data validation, XIFIN LIS Anywhere enables laboratories to stay competitive in an increasing complex environment.

Lab Services / Lab Supplies

6-Carboxytetramethylrhodamine

BOC Sciences
45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

6-carboxy derivatives of tetramethylrhodamine is one of the most convenient compounds of Xanthene fluorescent dye tetramethylrhodamine. 6-Carboxytetramethylrhodamine is a long-wavelength dye. Besides that, it also can be used for labeling of biomolecules, e.g., DNA, PNA, and peptides. Fluorescence: λ_{ex} 543 nm, λ_{em} 575 nm in 0.1 M Tris pH 8.0; λ_{ex} 540 nm, λ_{em} 565 nm in methanol; λ_{ex} 555 nm, λ_{em} 580 nm; λ_{ex} 541 nm, λ_{em} 568 nm in DMSO

Antibody Drug Conjugates

BOC Sciences
45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

Antibody-drug conjugates (ADCs) are a very important class of highly potent drugs designed as a targeted therapy for the treatment of people who has cancer.

Cariprazine

BOC Sciences
45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

Cariprazine is an orally active D2/D3 dopamine receptor antagonist exhibits high selectivity and affinity to dopamine D3 and D2 receptors and moderate affinity to serotonin 5-HT(1A) receptors. It is used as an antipsychotic drug candidate for the potential treatment of schizophrenia, bipolar mania and depression. It has also been used as a potential adjunct in treatment-resistant major depressive disorder.

Iron oxide nanoparticles

BOC Sciences
45-16 Ramsey Road
Shirley, NY 11967
(631) 619-7922
www.bocsci.com

BOC Sciences offers high-quality superparamagnetic iron oxide microbeads. Our products include various-sized magnetic beads with different coupling groups for the conjugation of biomolecules. We have established a high-level platform that involves many scientists and a full set of instruments to guarantee the quality of our products and services and thereby help to facilitate your researches.

GABRA4 Recombinant protein

Flarebio Biotech LLC
8400 Baltimore Avenue, Room 332
College Park, MD 20740
(301) 363-4651
www.cusabio.com/

Flarebio Biotech LLC is specialized in the research and production of proteins, antibodies & ELISA kits, and many related products. We will offer GABRA4 Recombinant protein with premium quality at great price.

Microfluidics

90 Glacier Drive
Westwood, MA 02090
(617) 969-5452
www.microfluidicscorp.com

Microfluidics provides equipment that helps to solve nanotechnology application changes in pharmaceutical, biotech and other industries. They are a leader in the design and production of laboratory and commercial processing equipment.

Quadro Engineering

613 Colby Drive
Waterloo, Ontario, Canada N2V1A1
(519) 884-9660
www.quadro.com/products/fine-grind/

The Fine Grind has superior product quality, unparalleled mobility and a higher productivity than its competitors.

Quadro Liquids

613 Colby Drive
Waterloo, Ontario, Canada N2V1A1
(519) 884-9660

www.quadroliquids.com/industries/food-processing-equipment/
Quadro Liquids designs and manufactures single-pass, inline high shear mixing equipment for powder incorporation and dispersion into liquids.

Thermo Fisher Scientific MagMAX DNA Multi-Sample Ultra 2.0

Thermo Fisher
168 3rd Avenue
Waltham, MA 02451
(617) 275-6547
www.thermofisher.com

MagMAX DNA Multi-Sample Ultra 2.0 reagents provide genetic testing companies, labs and service providers with fast, hassle-free and high-throughput DNA extraction from blood, saliva, buffy coat and buccal swabs. Using magnetic beads on an automated system, the reagents enable labs to standardize and accelerate sample purification while maintaining consistent results. They can purify DNA from 96 samples in 45 minutes using a simplified protocol for either small- or large-volume sample input.

Invitrogen TrueCut Cas9 Protein v2

Thermo Fisher
168 3rd Avenue
Waltham, MA 02451
(617) 275-6547
www.thermofisher.com

The latest version of Thermo Fisher Scientific's Cas9 protein is designed to deliver maximum editing efficiency in a broad range of cells, including standard, immune, primary and stem cells. The next generation CRISPR-Cas9 protein provides a robust, reliable and efficient way of knocking out a gene's expression, introducing changes or making precise edits. It is designed to deliver consistently high editing efficiency, even in difficult targets or in cells that are difficult to transfect.

Molecular Diagnostics

Cofactor Paragon

Cofactor Genomics

4044 Clayton Avenue

St. Louis, MO 63110

(314) 531-4647

www.cofactorgenomics.com

Paragon: Profiling micro-environment cell report for Immunology. Cofactor Paragon reports on the cellular components of the tumor micro-environment. 32 cell types are reported and provide valuable insight in studies aimed at understanding how the micro-environment and the immune activity plays a key role in efficacy of treatment.

Cofactor Pinnacle

Cofactor Genomics

4044 Clayton Avenue

St. Louis, MO 63110

(314) 531-4647

www.cofactorgenomics.com

Pinnacle: The RNA-based biomarker panel for cancer. Cofactor Pinnacle enables the identification of important cancer associated features, not detectable by DNA sequencing alone. Pinnacle measures the RNA expression of 318 prominent cancer genes, identifies those with oncogenic expression, and enables fusion identification in 283 critical cancer associated genes from any type of formalin-fixed or fresh frozen solid tumor in a CAP-CLIA certified lab.

Fluorescent dyes, phosphoramidites for oligonucleotide synthesis

Lumiprobe

1835 E. Hallandale Beach Boulevard, #221

Hallandale Beach, FL 33009

Cofactor FFPEExact

Cofactor Genomics

4044 Clayton Avenue

St. Louis, MO 63110

(314) 531-4647

www.cofactorgenomics.com

Low-quality RNA-Seq. With the vast majority of patient samples and clinical archives stored as FFPE tissue, a reliable solution for chemically-modified and fragmented RNA is required. FFPEExact evaluates RNA fragmentation via DV200 analysis, then applies standardized library prep protocols to guarantee reproducible, interpretable results. Delivers: 1) Non-biased analysis of fragmented RNA 2) Minimal reads lost to ribosomal content 3) Access to valuable clinical archives and patient samples.

Cofactor mRNAble

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

RNA-seq poly(A) enrichment of mRNA species in your samples. Focus your sequencing reads on coding regions of the transcriptome with 30- or 60-million reads, guaranteed, with 3 week turnaround. Make the most of your analysis with transcript annotation. Excellent approach for model and non-model organisms, alike.

Cofactor Paragon

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

Paragon: Profiling micro-environment cell report for Immunology. Cofactor Paragon reports on the cellular components of the tumor micro-environment. 32 cell types are reported and provide valuable insight in studies aimed at understanding how the micro-environment and the immune activity plays a key role in efficacy of treatment.

Cofactor picoRNA

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

Low-input RNA Expression Characterization. Perfect for precious biological samples resulting from: LCM, sorted cells, FNAs, or other small snap-frozen tissue biopsies that yield minimal, yet high-quality RNA (< 250 ng). Cofactor has developed this robust amplification protocol to allow unbiased interpretation of transcriptome data from as low as 10-20 cells (100 pg of RNA).

Cofactor Pinnacle

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

Pinnacle: The RNA-based biomarker panel for cancer. Cofactor Pinnacle enables the identification of important cancer associated features, not detectable by DNA sequencing alone. Pinnacle measures the RNA expression of 318 prominent cancer genes, identifies those with oncogenic expression, and enables fusion identification in 283 critical cancer associated genes from any type of formalin-fixed or fresh frozen solid tumor in a CAP-CLIA certified lab.

Cofactor Total RNAble

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

RNA-seq of total RNA including non-coding species achieved through depletion of ribosomal species. Allows for the analysis of lncRNA and non-polyadenylated species. More forgiving molecular approach than poly(A), able to accommodate some sample degradation. Access the breadth of your sample's transcriptome! Ideal for model organisms (HMR). All projects include our molecular QC checkpoints at each stage in the molecular workflow, and full DE analysis delivered via the ActiveSite interface.

Microbiome Discovery Service

Second Genome Solutions
341 Allerton Avenue
South San Francisco, CA 94080
(650) 489-7871
www.secondgenome.com/solutions/

Second Genome Solutions offers an end-to-end Microbiome Discovery Service allowing you to go from Sample to Smarter. Each project is customized to your specific study and includes sample collection logistics, nucleic acid isolation, raw data generation, bioinformatics, and data interpretation.

Second Genome has developed an industry leading Microbial Profiling platform built on proprietary databases that has been used on over 400 projects and processed over 75,000 samples.

miRNAble

Cofactor Genomics
4044 Clayton Avenue
St. Louis, MO 63110
(314) 531-4647
www.cofactorgenomics.com

Small RNA-seq. Enrichment of small RNA molecules including miRNA, snoRNA, and more. Economical read depth (10 million reads) ensures high coverage of desired molecules. Annotation using comprehensive database and comparative expression analysis. Cofactor's small RNA characterization is optimized for total RNA samples, which streamlines sample delivery for you.

7730 E. Greenway Suite 205
Scottsdale, AZ 85260
www.systemsimagination.com

Systems Imagination offers tech-enabled services to accelerate the discovery and evolution of scientific knowledge. SII's Big Data to Knowledge Solution uses a proprietary knowledge computing platform and expert analytical services by world-class team of experts, enabling clients to translate Big Data into useful scientific knowledge with unprecedented speed and precision.

iSpecimen Marketplace

iSpecimen
450 Bedford Street, Suite 1100
Lexington, MA 02420
(781) 301-6700
www.ispecimen.com

The iSpecimen Marketplace provides researchers with the specimens they need from the patients they want. It connects healthcare organizations that have access to patients and specimens, including biofluids, solid tissues, and viable cells, with scientists who need them. Researchers log on and gain instant access to millions of specimens anytime, anywhere. Provider organizations gain an opportunity to contribute their specimens compliantly to medical research as well as enhance their bottom line.

Preclinical

PDOX® Pre-Clinical Research Services

AntiCancer PDOX, Inc.
7917 Ostrow Street
San Diego, CA 92111
(858) 654-2555
anticancerpdx.com

The PDOX technique is the most clinically accurate mouse cancer model, especially with regard to metastasis and drug sensitivity. Using GFP imaging, primary tumor growth and metastases can be tracked in real-time. Effective drugs can be rapidly discovered and evaluated in PDOX models utilizing human tumor cell lines and patient tumors. We provide customized contract services for in vivo drug evaluation, including developing cancer models and design of individual protocols.

Vevo 3100

Fujifilm, Visualsonics Inc.
3080 Yonge Street
Toronto, Canada M4N3N1
(416) 580-0258
www.visualsonics.com

The Vevo 3100 is a new and innovative platform created for the future of imaging. It combines ultra high-frequency ultrasound imaging, quantification and education in a convenient easy to use all-in-one platform designed for small animal studies.

Project Management

Asset Panda

www.assetpanda.com/
3001 Dallas Parkway, Suite 580
Frisco, TX 75034
(855) 898-6058
www.assetpanda.com/

Asset Panda supplies asset tracking software and a free mobile app with built-in scanner to track everything from equipment, to inventory, to schedules. Asset Panda provides the platform, hosted in the cloud, which is completely customizable for businesses and people to track the things they need to.

Protein Detection

Article Galaxy

Reprints Desk
15821 Ventura Boulevard
Encino, CA 91436
info.reprintsdesk.com/
One-Click Access to Full-Text Content

Article Galaxy is an award-winning software-as-a-service (SaaS) research platform that provides you with one-click access to any scientific paper, filtering against Open Access, subscriptions, and even full-text rentals. Article Galaxy Widget injects into any website via browser bookmark and extracts citations for simplified viewing, enabling you to access, purchase or rent full-text documents right within your search results on 70+ search portals!

Cell Counting Kit-8 (CCK-8)

Abbkine Scientific
Bldg 1, Harbour of Technology Times, No.35, Optical Valley Avenue
Wuhan, China 430074
0-27-597-16789
www.abbkine.com

Cell Counting Kit-8 (CCK-8) is designed to detect cell proliferation and cell toxicity based on WST-8 is reduced by dehydrogenases in cells to give an orange colored product (formazan). The amount of the formazan in cells is directly proportional to the number of living cells. Tests confirm that performance equals or exceeds popular CCK-8 kit from other suppliers.

Proteomics

Fluorescent dyes, phosphoramidites for oligonucleotide synthesis

Lumiprobe
1835 E. Hallandale Beach Boulevard, #221
Hallandale Beach, FL 33009
(888) 973-6353
www.lumiprobe.com

Lumiprobe manufactures & sells fluorescent dyes, phosphoramidites for oligonucleotide synthesis, Click chemicals and other reagents. Most items are ready for immediate shipping to worldwide locations.

ULTimate YChemH

HYBRIGENICS CORP
1 Broadway
Cambridge, MA 02142
www.hybrigenics-services.com/contents/our-services/discover/ultimate-ychemh

ULTimate YChemH is a unique screening platform for target deconvolution of bioactive compounds, to decipher mechanisms of action, to identify secondary targets, to reposition drugs and to predict toxicity

Reference Guides

Insight Pharma Reports

Insight Pharma Reports
250 First Avenue, Suite 300
Needham, MA 02494
Phone: 781-972-5400
www.insightpharmareports.com

Insight Pharma Reports are written by experts in consulting and industry who collaborate with us to provide a series of reports that evaluate the salient issues in pharmaceutical technology, business, and therapy markets. Insight Pharma Reports are used by leading pharmaceutical, biotech, diagnostic, consulting, and financial companies to keep abreast of the latest advances in pharmaceutical R&D, their potential applications and business impacts, and their current and future position in the marketplace.

Nextgen Healthcare

Nextgen
795 Horsham Road
Horsham, PA 19044
(215) 675-7010
www.nextgen.com/

NextGen Healthcare provides software, services, and analytics solutions to the ambulatory care market delivering the foundational capabilities to organizations that want to promote healthy communities. NextGen Healthcare provides health information technology solutions to empower physician practice success, enrich the patient care experience and lower the cost of healthcare.

sciNote ELN

sciNote LLC
3000 Parmenter Street
Middleton, WI 53562
scinote.net/

sciNote is a free, open source electronic lab notebook. It is developed for scientists to manage and organize their research data and safely store it all in one place. It can also be used as a communication tool between professors and students, since it encourages scientific collaboration. It can either be used as cloud software or installed locally.

Slidematch

microDimensions
Rupert-Mayer-Str. 44 // Gebäude 64.07
München, Germany 81379
0 89 189425334
micro-dimensions.com

microDimensions Slidematch™ is a simple yet powerful tool that takes a series of whole slide images, aligns all of them accurately, and then saves the aligned images as a new series of whole slide images. This enables correlation and/or masked analyses.

Software Quality Assurance Services

XBOSoft
11720 Sunrise Valley Drive
Reston, VA 20191
(844) 386-7080
xbosoft.com/

XBOSoft offers software quality assurance services. Their services include Quality Process Assessment (QPA), Test Process Improvement (TPI), Test Automation Assessment, Software QA Consulting, and Mentoring.

Voloom

microDimensions
Rupert-Mayer-Str. 44 // Gebäude 64.07
München, Germany 81379
0 89 189425334
micro-dimensions.com

microDimensions Voloom® is the most intuitive and automated software solution for 3D histology reconstruction, visualization, and analysis in digital pathology. Voloom helps pharmaceutical, biotechnology, and pathology researchers with cell counting, tumor border computation, scoring, volume measurements, finding regions in serial sections, and many more histology applications.

XIFIN ProNet

XIFIN
12225 El Camino Real
San Diego, CA 92130
(858) 436-2995
www.xifin.com

XIFIN ProNet: Physician Collaboration and Clinical Data Management

Collaborate and communicate across departments, disciplines, and organizations in a cloud-based exchange of diagnostic images, clinical data, and other patient encounter information. XIFIN ProNet enables consolidated storage, sharing, and usage of clinical and financial images and information with a web-based enterprise class data repository and integrated workflows.

XIFIN RPM

XIFIN
12225 El Camino Real
San Diego, CA 92130
(858) 436-2995
www.xifin.com

XIFIN ProNet: Physician Collaboration and Clinical Data Management

XIFIN RPM (Revenue Performance Management) give laboratories the ability to take control of their billing operations and financial performance. Maximize your financial performance with a technology platform and optimized business processes. Gain control and visibility over reimbursement and AR, with auditable, GAAP & SOX-compliant, scalable solution.

Zoom

microDimensions
Rupert-Mayer-Str. 44 // Gebäude 64.07
München, Germany 81379
0 89 189425334
micro-dimensions.com

microDimensions Zoom is a free of charge digital pathology viewer for fast visualization of whole slide images and image series. It supports all major proprietary as well as generic file formats.

Storage

NODEUM

MT-C S.A.
Rue Ernest Solvay 29 A
Liège, Belgium 4000
mt-c.com/

MT-C has reinvented intelligent storage to create innovative and strategic storage solutions encompassing today's market challenges. MT-C has designed and developed NODEUM, a forefront Software-Defined Storage appliance. It delivers unique combination of intelligent data analytics layer and virtualized file system distributing data on hybrid storage. MT-C has become a key actor in industries that are facing the big data explosion such as the life science and genomics..

Systems Biology

CRISPRRevolution

Synthego
3696 Haven Avenue, Ste. A
Redwood City, CA 94063
www.synthego.com/

CRISPRRevolution is a portfolio of synthetic RNA designed for CRISPR genome editing and research. Designed by you and built by Synthego, our products offer economical access to fully synthetic RNA for high fidelity editing and increased precision in genome editing.

Training Services

Training Services

Barnett Educational Services
250 First Avenue, Suite 300
Needham, MA 02494
Phone: 781-972- 5400
www.BarnettInternational.com

Barnett Educational Services is a leader in training and resources for clinical research professionals. The Barnett approach is unique in that it combines content development expertise with a high level of subject matter experience, engaging instructional design and a multi-platform approach.
